

Data & AI Impact Workshop

Investors and founders work together to protect rights and revenues

Are you and your portfolio ready for the future?

While data technologies accelerate growth, they also have devastating unintended consequences. Well-meaning but unprepared **companies may cause severe damage** to individuals, society, the planet, and themselves.

In this workshop, investors and their portfolio companies work together to protect their stakeholders and their organizations from data and AI harms.

Number of AI laws world-wide:

123

37x more than 2016

Of all AI companies, only

6%

Have implemented AI ethics protections
